PROFESSIONAL EXPERIENCE

SAP ABAP Lead Consultant (Software Development Lead)

Dec 2025 – Present

Accenture India | Noida, UP

- Lead end-to-end ECC-to-S/4HANA migration workstreams, owning HANA remediation of 60+ custom ABAP objects to eliminate ATC critical findings and ensure Clean Core compliance across client landscapes
- Develop and optimize CDS Views, OData V4 Services, and RAP-based Fiori applications on SAP BTP ABAP Environment, reducing custom footprint by ~30% through Released API adoption and side-by-side extensibility patterns
- Redesign legacy ABAP programs using code push-down techniques and AMDP, achieving query-level performance improvements of 40–60% on large HANA datasets
- Collaborate with SmartShift product team to build automation tools accelerating ABAP code conversion and migration assessment; tooling reduces manual analysis effort by ~35% per sprint
- Conduct structured code reviews across a team of 6+ ABAP developers, enforcing ATC standards, Clean Core guidelines, and ABAP Unit Testing (TDD) practices
- Partner with functional architects across SAP FICO, MM, and SD modules to translate complex business requirements into scalable Clean Core technical solutions
- Utilize ABAP Runtime Analysis, SQL Trace, ATC, and System Dump Analysis to diagnose and resolve critical performance bottlenecks in production environments

SAP ABAP Consultant / Infosys Certified SAP Fiori Consultant

May 2021 – Dec 2025

Infosys Private Limited (EAS SAP Unit) | Noida, UP

- Progressed from ABAP Developer to AMS Track Lead within 18 months; led technical delivery for 3 concurrent application management projects serving global manufacturing and logistics clients
- Developed 20+ Reports (Classical, Interactive, ALV/SALV) and interface programs (Proxies, RFC, IDocs, Web Dynpro) across SAP FICO, MM, and SD functional areas
- Architected and delivered SAP Workflow solutions for multi-level approval automation, reducing manual processing time by ~40% across client business units
- Built and maintained SmartForms, Adobe Forms, and SAPscript layouts for business-critical output documents (BOLs, packing slips, financial statements) spanning 5+ functional areas
- Applied ABAP 7.5 modernisation techniques (inline declarations, ABAP SQL enhancements, method chaining) across legacy codebase, cutting average program runtime by 25–35%
- Led ALE/IDoc integration with external systems, managing end-to-end data exchange for master data migration projects using BAPIs across 3 client landscapes
- Acted as AMS Track Lead (Aug 2022 – Dec 2025): resolved P1/P2 production incidents on live client calls, managed project delivery without major escalations, and presented POCs to client stakeholders
- Received 16 consecutive INSTA Rewards and 5 Unit Rise Awards for sustained delivery excellence; formally recognised by logistics client for LT03 custom solution that avoided a €50K+ third-party tool cost

KEY PROJECTS

SmartShift Automation Tool — Accenture

Dec 2025 – Present

- Collaborating with the SmartShift product team to build ABAP code automation tooling; reduced manual S/4HANA migration assessment effort by ~35% per sprint, directly accelerating client go-live timelines

ABAP Cloud RAP Reference Project (Open Source) — Accenture / SAP BTP

Jan – Mar 2026

- Built a reference RAP model on SAP BTP ABAP Environment covering Business Object definition, OData V4 service exposure, and Fiori Elements UI; adopted as internal onboarding material for 3 developers
- GitHub: github.com/rahulmsingh337/abap-cloud-rap-reference-project

S/4HANA Migration Code Cookbook (Open Source) — Accenture

Jan – Mar 2026

- Published an open-source SAP migration reference guide covering HANA remediation patterns, Clean Core best practices, and AMDP migration templates; actively referenced during client migration sprints
- GitHub: github.com/rahulmsingh337/s4hana_migration-code-cookbook

SAP Workflow – Multi-Level Approval Automation — Infosys | Global Manufacturing Client

Sep 2023 – Jan 2024

- Designed and implemented end-to-end SAP Workflow for automated multi-level purchase approval routing; configured business object methods, workflow tasks, agent determination, and deadline monitoring
- Reduced manual approval processing time by ~40% and eliminated untracked escalations across a 500+ user business unit

LT03 Custom Transaction – Client-Critical Enhancement — Infosys | Global Logistics Client

Nov 2023 – Jan 2024

- Led end-to-end analysis and POC for a client-blocking LT03 limitation; built a custom ABAP transaction to bypass the constraint, securing client sign-off and avoiding a €50K+ third-party tool purchase
- Delivered on time with zero post-go-live defects; received formal client appreciation letter

US Email Automation – BOL & Packing Slip Enhancement — Infosys | Global Manufacturing Client

Feb – May 2024

- Led assessment and enhancement of email automation for Bill of Lading and packing slip outputs; implemented PO/DN consolidation logic eliminating ~200 duplicate email triggers per month
- Reduced output processing time by 30% and directly improved warehouse operations SLA compliance

Traceability Report Development — Infosys | SD/MM Client

Aug 2024 – Apr 2025

- Developed a custom ABAP traceability report providing end-to-end order and delivery summary per business user; replaced a 4-hour manual monthly report with an on-demand 2-minute automated run

COPA Report Reconciliation — Infosys | SAP FICO Client

Sep – Dec 2023

- Built a reconciliation report fetching frozen index data from background jobs, calculating FI, CO-PA, and Statistical values against posting date selections; reduced month-end close manual reconciliation by ~4 hours per period

INNOVATION & PORTFOLIO PROJECTS

SAP Portfolio Website – Professional Branding Platform — Personal

2024 – Present

- Built a full-stack portfolio at rahulsinghsap.netlify.app showcasing SAP expertise, certifications, and project delivery; includes Gemini API-powered FeedbackBot and Firebase Auth-gated admin layer
- Implemented full SEO: JSON-LD structured data, Open Graph tags, sitemap.xml, robots.txt, Google Search Console verification — improving recruiter and peer discoverability

Promptify – AI Prompt Engineering Application — Personal

2025 – Present

- Built an AI-driven prompt optimisation application at promptifytech.vercel.app (React/TypeScript, Firebase Auth, Gemini API, Express backend) — demonstrating full-stack capability and SAP + AI convergence initiative
